Skin Specialist Clinic

Our skin, the body's largest organ, protects us from daily threats like bacteria and UV rays. Prioritising professional care is essential for overall health, not just external beauty. Regular check–ups can detect early signs of skin damage or skin cancer, enabling timely treatment.

At Tung Shin Hospital, we offer a range of medical, surgical, and skin treatments tailored to your needs, provided by our expert team of dermatologists, surgeons, and allied health professionals.
